

## 【 Prospect 】

This Satellite Workshop focuses on two crops of the banana family: banana (*Musa* spp.) and enset (*Ensete ventricosum*). The workshop will investigate how Asian and African societies have adopted, expanded, and maintained livelihood systems based on these crops, and will compare the processes of creating banana and enset livelihood systems in various agro-ecological and socio-cultural settings.

In this Workshop, we will first consider macro-level areas, in order to understand the processes by which banana and enset livelihood systems have been established and maintained. Next, we will focus on micro-level studies to examine the development of banana and enset fields by individual farmers, the maintenance of landrace diversity in fields, and the diverse varieties of crops in banana and enset fields. Finally, we will discuss these two levels from an interdisciplinary perspective encompassing the areas of ecological anthropology, social anthropology, agricultural economics, and genetic resources management and conservation.

## 【 Program 】

	13:30-14:00	Endashaw Bekele	
10:10-10:30	Preliminary remarks -SATO Yasuaki	14:00-14:30	Genet Birmeta
10:30-11:00	Mamo Hebo	14:30-14:45	Tea Break
11:00-11:15	Tea Break	14:45-15:15	SATO Yasuaki
11:15-11:45	Wilberforce Kateera Tushemereirwe	15:15-15:45	SHIGETA Masayoshi
11:45-12:15	Dezi Seburo Ngambeki	15:45-16:00	Tea Break
12:15-13:15	Luncheon session-ISHIKAWA Kiyoshi	16:00-17:00	Round Table Discussion
13:15-13:30	Tea Break		

### **Wilberforce Kateera Tushemereirwe.** **Uganda**

*Program Leader. National Banana Research Programme, \*\*NARO. His presentation would be "Lessons from Participatory On-Farm Research in Uganda."*

### **SHIGETA Masayoshi. Japan**

*Associate Professor. \*ASAFAS. His presentation would be "Folk In-Situ Conservation and Food Security: Indigenous Development in Enset Areas in South Omo, Ethiopia."*

## 【Speakers】

### **Endashaw Bekele. Ethiopia**

*Professor. Addis Ababa University, Dept. of Biology. His presentation would be "The Present Status and an Overview of Research on Ensete ventricosum".*

### **Genet Birmeta. Ethiopia**

*Researcher. Ethiopian Institute of Agricultural Research. Her presentation would be "Enhancing the Food Security of the Ethiopian Population Dependent on Enset as Staple Food through Biotechnology."*

### **ISHIKAWA Kiyoshi. Japan**

*Journalist. His presentation would be "Bananas for Fiber and Food: Two types of Banana Linking Japan with Other Parts of Asia."*

### **Mamo Hebo. Ethiopia**

*JSPS Research Fellow. ASAFAS. His presentation would be "The Evolution of a Sustainable Enset-Livestock-Based Livelihood System in the Arsii Oromo Highlands, Southern Ethiopia."*

### **Dezi Seburo Ngambeki. Uganda**

*Agricultural Economist. National Banana Research Programme, \*\*NARO. His presentation would be "Trends in Marketing Bananas in Southern Uganda."*

### **SATO Yasuaki. Japan**

*Ph.D Candidate. \*ASAFAS. His presentation would be "Homegardens and Landrace: The Process of Maintaining Banana Diversity in Buganda, Central Uganda."*
